If there are any ties, we will have a tie breaker.

Winner will be notified Saturday the 16th. Winner's name will be display in Golf Shop

Introducing Tiffany Hargaves, Controller

Tiffany is originally from Washington State and grew up in Olympia, Washington. Her younger years she was an avid soccer player who traveled to different states including Canada playing for a select team where she received awards for MVP.

Tiffany's adult life was spent in the Seattle area. She met her soulmate Mike there and they moved to Salt Lake for 5 years. Tiffany and Mike have lived in Mesquite for 5 years now.

Coming from an accounting background Tiffany felt she could use her talent on filling the shoes of Michelle Arnett who is retiring from Oasis Golf Club after being there for 8 + years. Michelle will be greatly missed.

Tiffany can be found on the pickleball courts teaching and playing the best game ever invented. Golf is going to be her second adventure. Tee Time!

News From The Turf Care Center

There has been much discussion on the poor overseed on the Palmer course this year. The simple answer is the bermudagrass outgrew and overtook the overseeded ryegrass. But there are a number of contributing factors. Less aggressive prep work on the bermudagrass, lower-end seed rates, warmer than normal temperatures, traffic, follow-up seeding, and timing of growth regulators and fertilizers applications are all factors when it comes to a successful overseed.

Next year we will be more aggressive in prepping our bermudagrass, but it is a fine line not to lose a good bermuda base. It is important to have good bermudagrass base for year-round overseeded golf courses in the desert. Second, we will increase our seed rates to help insure a more competitive chance with the bermudagrass. Third, we will pray for cooler temperatures. Fourth, we will manage traffic better, keeping carts off of the overseed until it can handle the traffic. Fifth, we will do a better job going back in and spot seeding thin areas as needed. Lastly, we will be more aggressive with growth regulators (again a fine line not to setback a good bermuda base) to try and slow the bermudagrass growth if temperatures don't cooperate.

As far as this year goes, we are excited to see the warmer temperatures coming and the grass beginning to grow. We will mow and keep the course very playable, but tight lies will be the conditions we will be playing with. To keep playing conditions neat and clean we will be mowing down the overseeded areas to avoid uneven clumpy lies.

We are on Nematode watch and testing and treating the greens as needed.

Throughout the winter we have done a lot of trimming, cleaning and edging on both courses for a very neat and clean look.

We are looking forward to a great spring and summer golf season coming up. Let's all do our part, repair ball marks, fill divots, follow signage and ropes, double up and show respect to the golf course and your peers.

Scott Polychronis, Course Superintendent
